

MOHAMMAD ABU AISHEH

Full Stack Developer | .NET & Angular

Amman, Jordan | +962 782 587 636 | Mohammadabuaisheh40@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

Full Stack Developer specializing in .NET 9 (ASP.NET Core, Clean Architecture, CQRS) and modern Angular (Standalone Components, Signals, rxjs). Proven experience designing secure, high-throughput systems, including architecting a 14-module modular monolith with ~549 REST endpoints (YallaJo) and applying enterprise frontend patterns under senior engineering mentorship at MoDEE. Combines strong backend domain modeling with reactive UI architectures, backed by a B.Sc. in AI.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java, SQL, HTML5, CSS3/SCSS

Frontend: Angular (Standalone Components, Signals, rxjs), Bootstrap

Backend & Architecture: .NET 9, ASP.NET Core (Web API, MVC, Minimal APIs), EF Core, LINQ, MediatR/CQRS, SignalR, Clean Architecture, Modular Monolith, Repository/UoW, Outbox/Inbox, BFF

Data, Security & Tools: SQL Server, SSMS, ASP.NET Identity, JWT/Refresh Tokens, OAuth2, RBAC/Claims, Rate Limiting, OTP, CSP, Git/GitHub, Visual Studio, VS Code, Postman, Nethereum, QuestPDF, Serilog, ClosedXML

WORK EXPERIENCE

MINISTRY OF DIGITAL ECONOMY AND ENTREPRENEURSHIP (MoDEE)

Frontend / Angular Developer Intern | Amman, Jordan | Jun 2026 – Sep 2026

- Built responsive Angular, TypeScript, and RxJS interfaces and integrated RESTful services with asynchronous state, reactive forms, and client-side validation.

ARABEXCOIN (Freelance) – [arabexcoin.com](#)

Backend & Blockchain Integration Developer | Remote | Nov 2025 – Feb 2026

- Led ASP.NET Core 8/Nethereum wallet integration for a live ARX token presale on Binance Smart Chain, including nonce authentication, Chainlink BNB/USD feeds, and Multicall reads.
- Built purchase verification, transaction monitoring, and 13 background services for real-time blockchain synchronization and statistics aggregation.

CODERZ FOR SOFTWARE AND TRAINING

Full Stack Web Development Bootcamp | Amman, Jordan | Oct 2024 – Jan 2025

- Developed ASP.NET Core MVC applications with C#, SQL Server, JavaScript/jQuery, Bootstrap, OOP, session/JWT authentication, and delivered a multi-role hotel booking capstone.

TECHNICAL PROJECTS

YallaJo — Tourism & Travel Marketplace (Graduation Project)

.NET 9, Clean Architecture, CQRS, SignalR

- Architected a 14-module modular monolith with ~549 versioned REST endpoints, independent EF Core schemas/DbContexts, and 29 hosted background services for SEO sitemaps, payouts, and refund retries.
- Built reusable CQRS/MediatR and validation pipelines, transactional Outbox/Inbox with dead-letter handling, and an ASP.NET Core MVC BFF with circuit-breaker resilience, Arabic/English RTL, and SignalR.

FakeStore — E-Commerce Web Application [\[GitHub\]](#)

Angular, TypeScript, NgRx, Signals, RxJS

- Built a modular Angular Standalone SPA consuming external REST APIs, with NgRx Store/Actions/Effects + Signals for catalog filtering and dynamic cart state.
- Implemented Functional Route Guards/HTTP Interceptors, auth token injection, centralized errors, reactive forms/custom validation, localStorage cart persistence, and toast notifications.

UniSelector — University Admissions Platform [\[GitHub\]](#)

ASP.NET Core 9, EF Core, SignalR, SQL Server

- Built smart recommendation and application-tracking workflows, PDF discount certificates, 4 role portals, and CSV compliance exports.

The Auction Room — Real-Time Bidding System [\[GitHub\]](#)

ASP.NET Core 8, SignalR, EF Core, MailKit

- Built proxy bidding, reserve pricing, real-time SignalR updates, and an IHostedService for auction closeout, winner resolution, and MailKit alerts.

SBMS — Student Behavior Management System [\[GitHub\]](#)

ASP.NET Core 8, EF Core, ClosedXML, SMTP

- Built a multi-school platform with 6 RBAC roles, automated absence notifications, academic-year rollover, and ClosedXML reporting.

More project details, architecture, and source code are available on [GitHub](#)

EDUCATION

AL-ZAYTOONAH UNIVERSITY OF JORDAN — B.Sc. in Artificial Intelligence | Amman, Jordan | Sep 2026

GPA — 76.5 Very Good

CERTIFICATIONS & TRAINING

Full Stack Web Development Bootcamp (180 hrs) — Coderz (Talal Abu-Ghazaleh accredited) | 2025

- ASP.NET Core MVC Specialization (160 hrs) — Coderz (2024)
- Professional Soft Skills (20 hrs) — Digital Marketing & Communication Skills (2024)

LANGUAGES

Arabic: Native / Mother Tongue | **English:** Professional Working Proficiency
